

Peer Review: Math Tutor V3

Name: Ethan Hoge Peer: Khumo Nakedi

During this project I feel like it went the smoothest, compared to the other math tutors. Khumo was easy to contact, and we both equally did different parts of the code. Khumo did not see the message I sent to him, so we accidentally pushed two different codes up to the repository. However, by the end of it we got through it and ended up just fine.
